Paraphernalia

Power

Carbon's powers create a set called Little Dark Age. This set includes a base ability with several complementary abilities. The chart to the right displays a basic overview on the power set, from range, how easily it can be used, how 'strong' it is, and how available it is for him to use. Little Dark Age has constraints explained for each ability in the power sheet, and a weakness sheet to counterbalance the ability. The top headings of these additional sheets are interactive, meaning they contain links to other corresponding documents

[Little Dark Age](#) [Weaknesses](#)
